

DND Barber Academy – Admin Dashboard Features

The DND Barber Academy Admin Dashboard is a secure management portal designed to give administrators complete control over the website's content and day-to-day operations without requiring any technical knowledge.

Dashboard Overview

Upon logging in, administrators are presented with a dashboard that displays a summary of the day's activities, allowing them to quickly monitor important information and stay updated with current events.

Student Enrollment Management

The dashboard allows administrators to manage all student enrollments from one place. You can:

- View all enrolled students.
- View each student's payment status (Paid/Unpaid).
- Access enrollment information and student details.
- Quickly search for a specific student.
- Filter students based on different criteria.
- Sort records by various fields.
- Export student records to **PDF** or **Excel** for reporting and record keeping.

Course Management

Administrators have complete control over the courses offered by the academy, including:

- Add new courses.
- Edit existing course information.
- Update course pricing.
- Remove courses when necessary.
- Keep course information accurate and up to date.

Service Management

The dashboard allows administrators to manage all academy services by:

- Adding new services.
- Editing service descriptions and information.
- Updating service pricing (where applicable).
- Removing services that are no longer offered.

Contact Message Management

All messages submitted through the website's contact forms are stored within the dashboard, allowing administrators to:

- View inquiries from visitors.
- Read message details.
- Organize and manage communication from prospective students and customers.

Advanced Data Management

Every management section that displays data includes professional data table features to make administration easier:

- Instant search.
- Advanced filtering.
- Column sorting.
- Export to PDF.
- Export to Excel.

These features make it easy to find information quickly, generate reports, and maintain accurate records.

Easy Administration

The dashboard is designed with a clean and intuitive interface, enabling academy staff to manage students, courses, services, and customer inquiries efficiently without requiring technical expertise.
